Alberta Netcare Portal –Release 9.2

This document outlines Alberta Netcare Portal changes available on
November 17, 2022.

Contents

Alberta Netcare Portal Enhancements

Microsoft Edge and Google Chrome browsers are now supported	
Description:	**Alberta Netcare Portal (ANP) now supports the Microsoft Edge and Google Chrome browsers.**
Details:	Users of Microsoft Edge and Google Chrome browsers can now log in to ANP.

|	
Clinical (transcribed) documents may appear as non-viewable at a patient's request	
Description:	**Documents that a patient has requested to be redacted from their patient record, with the authoring physician's approval, may appear in Alberta Netcare Portal (ANP) with a strikethrough in the CDV tree and a "redacted per patient request" message.**
Details:	If a patient requests a document to be redacted, and if the authoring physician approves the request and the report cannot be edited by the source system, the document can be flagged in ANP as redacted.
	When a document has been redacted, it will be displayed in the CDV Tree with a strikethrough. Clicking on the document will display a message indicating that the document has been redacted, along with the date.
	Note: this enhancement does not apply to lab or diagnostic imaging results.
	See the below example:

Certain lab tests that were displayed in Text format are now displayed in Numeric format

Description:	**The display format for some lab tests has been changed from Text to Numeric.**
Details:	The following lab tests were displayed in Text format but are now displayed in Numeric format.

LOCAL ORDER CODE	TEST NAME
LAB867	West Nile Serology Panel
LAB5502	.cc Donor HBV/HCV/HIV/NAT Panel
LAB4069	.cc Chlamydia Psittaci Serology
LAB38009	.cc Donor EBV Serology Panel
LAB6119	COVID-19 NAT
LAB22801	Acute Pharyngitis Screen
TS	TYPE AND SCREEN
M BETA	Throat Beta Strep Test
LAB1295	Bone Marrow Differential
MPXV PCR	Monkeypox Virus Nucleic Acid Test
MPXV PCR1	Monkeypox Virus Nucleic Acid Test

Lab flowsheet performance has been improved

Description:	**The flowsheets take less time to load due to performance improvements.**
Details:	Improvements have been made to both the "Lab Flowsheet-Provincial" and "Acute Lab Flowsheet-Provincial," resulting in improved flowsheet performance – flowsheets take less time to load.
