ANP UPGRADE QUICK REFERENCE:
Version 8.9 Overview

Alberta Netcare ELECTRONIC HEALTH RECORD

A change to the look of Alberta Netcare Portal (ANP) is planned for November 29, 2018.

While the new ANP may look different, the key functionality you are currently using will remain the same. Updates made to ANP have markedly improved its usability and user satisfaction.

Some of these updates include: new modernized look, improved access to Document View Tree, Flowsheets, Medications, Worklists and more, update to locations of icons and menu options, and change to supported internet browsers (Internet Explorer 11 or Firefox).
