

This quick reference provides instructions for viewing operative reports in Alberta Netcare Portal (ANP).

Community Information Integration (CII)

CII enables authorized health care providers to access data collected in community clinics through ANP. This includes consult letters and details of patient visits uploaded from CII-enabled clinics.

The latest CII data type addition, operative reports, enables community-based, CII-enabled specialist clinics to submit information regarding operative procedures such as preoperative and postoperative diagnosis, description of the surgical procedure, and any findings or complications encountered during the surgery.

How to View Operative Reports

- 1 Search for the patient and open their record.
- 2 In the Clinical Document Viewer (CDV), click the **Operative/Procedure/Investig'n** drop-down for a list of available operative reports.
