This quick reference provides instructions for viewing transcribed reports in Alberta Netcare Portal (ANP).

Transcribed Reports in ANP

The Clinical Document Viewer (CDV) includes all transcribed reports, such as:

- Operative reports
- Community reports (including Community Encounter Digest [CED])
- Consultations (consult report)
- Pathology reports
- Discharge/transfer summaries
- Community care profiles
- Cancer screening
- Mental health reports
- Electrocardiograms (ECGs)

| NOTE	✓ Transcribed reports must be reviewed/released before being viewable. ✓ Most reports are created within an Alberta Health Services (AHS) facility. ✓ Additional data sources are being added to Alberta Netcare.

CED

To view the CED, click the **Community Reports** drop-down, then click **Community Encounter Digest**.

Consult Reports

To view consult reports, click the **Consultations** drop-down, then click the report.

Cancer Screening

To view cancer screening reports, click the cancer screening drop-down, then click the report.

The report name in this folder will have the acronym ACSP (Alberta Cancer Screening Programs). *The folder will only appear if the patient is within the eligible population and has been assigned a screening status.
