

This quick reference provides instructions for reading patients' immunization history in Alberta Netcare Portal (ANP).

The **Immunization History** record includes immunizations provided by Alberta Health Services (AHS) and any publicly funded vaccines, such as influenza vaccinations, administered at pharmacies across the province. The record provides details of a patient's immunization events, including the date, the vaccine or antigen administered, and the service location.

Please refer to the data availability table for details on data contributors and submission frequency.

Immunization History

NOTE: Please be aware this may be an incomplete list of immunizations. Details on data contributors and submission frequency can be found here.

1	2 ? Vaccine Code ▲ ▼	4 Immunization Date ▲ ▼	5 Estimated Date	6 Age at Immunization	7 Immunization Alert	8 Adverse Reaction	9 Region of Service/Delivery Management Site
	? FLU	18-Apr-1969	Yes	38 years			Capital Health / Bonnie Doon
⊕	? DT	18-Apr-1964		33 years	Not Effective		Capital Health / Bonnie Doon
⊕	DRT	18-Apr-1954	Yes	23 years			Capital Health / Bonnie Doon
⊕	DT	18-Apr-2044		113 years			Capital Health / Bonnie Doon

Legend: Flu Adult Pediatric

12 Not Immunized Events

? Interview Date	Age	Antigen Not Administered	Antigen Code	Reason Not Immunized	Description	Region of Service/Delivery Management Site
No events available.						

13 Adverse Events Following Immunization

? Serious Flag	Report Date	AEFI Event	AEFI#	Hospitalized	Emergency Visit?
No Adverse Events available.					

Note: There may not be a linked Immunization event for every AEFI event.

NOTE If the immunization was administered when the patient was a child, the immunization event will display in **blue**. If the immunization was administered to an adult, the immunization event will display in **green**. All influenza vaccinations are displayed in grey.

Immunization History Table Legend	
1	Click to expand an immunization event. This will enable you to view the code and antigen of the selected immunization. Click to collapse.
2	Indicates a demographic mismatch has occurred (date of birth or gender) and is under investigation.
3	Click " Vaccination Code " to sort results alphabetically in ascending or descending order.
4	Click " Immunization Date " to sort immunizations by date, either chronologically or in reverse chronological order.
5	If the date of the immunization event was estimated and confirmed by a health care provider, Yes will display.
6	The age of the patient at the time of immunization displays in months and years for children (under 18 years), and in years only for adults.
7	Not Effective will display if the vaccine was given outside the recommended immunization schedule.
8	Yes will display if the patient has experienced an adverse reaction to the vaccine.
9	Lists the location of the immunization event
10	Click " Print " to print the patient immunization history as displayed.
11	Click " Data Inquiry " to request the investigation of a potential demographic or content mismatch displayed on the patient's immunization history if it has not already been flagged with a question mark.
12	The " Not Immunized Events " section will display refusals or other reasons the event did or will not occur.
13	The " Adverse Events Following Immunization " section describes the adverse event experienced by the individual following vaccination.

Alternatively, immunization history can be accessed from the **Dashboards** tab under **Patient Quick View**.

The screenshot shows a patient dashboard with a top navigation bar containing 'Limited Documents', 'All Documents', 'Dashboards', 'Flowsheets', 'Immunization History', and 'Medications'. Below this are several windowlets: 'Laboratory' (272 items), 'Diagnostic Imaging' (1 item), 'Medications' (6 items), 'Immunizations' (11 items), 'Event History' (36 items), and 'Consults' (No items). The 'Immunizations' windowlet is highlighted with an orange border. A callout box points to its icon with the text: "To view the immunization history record, click the Open Windowlet icon." Another callout box points to the windowlet's control icons (minimize, maximize, close) with the text: "The Windowlet can be minimized, expanded, or closed." The main window displays the immunization history for patient 46048-8014 BASHAW, ALIX JEFF, including a bar chart and a table of immunization events.

Vaccine Code	Immunization Date	Estimated Age at Immunization	Adverse Reaction	Region of Service-Delivery Management Site
COVMOmRNA	07-Oct-2023	43 years		Pharmacies / Unknown
HBV	03-Apr-2021	41 years		Peace Country Health / Peace River
				Peace Country
